smart AInnovators

Co-funded by the European Union

SETTING UP SYNERGIES WITH ENTERPRISES, NGOs, STAKEHOLDERS, ETC.

INTRODUCTION

This activity focuses on the creation of synergies / networks between our organizations and enterprises, NGOs, stakeholders, etc. for the sustainability of the project results. One of the aims being the participation as hosts for the study-visits that need to be conducted as part of the smartAInnovators PROGRAM.

PURPOSE

During this activity there are two main aims that need to be achieved:

1. The creation of relationships with enterprises, NGOs, stakeholders, etc. that could support and give feedback of the training materials created
2. The participation of the mentioned organizations to hosts study-visits as part of the smartAInnovators PROGRAM

Another possible activity for the mentioned group could be their participation as JURY on the National (and International) Hackathons, in order to have an exterior assessment.

All the tasks stated will also be used as part of the sustainability and impact of the project.

POTENTIAL PARTICIPANTS

The minimum number of entities that need to be reached is not stated on the proposal of the project. Thus, a minimum of 2/3 organizations (but not limited to) per partner will be the suggested figure. As previously mentioned, the possible groups are the following:

- Enterprises in related work sectors
- NGOs
- Education institutions (universities, high schools, VET centres, etc.)
- Related stakeholders

Each partner will need to fill a list of organizations that have accepted to participate in the project, in which basic information is requested.

MAIN RESULTS TO BE OBTAINED

As mentioned, there are 3 main possible results for this section:

- 1 list of smartAInnovators SYNERGIES
- The acceptance to participate in the STUDY-VISITS

- The acceptance to participate as JURY in the NATIONAL HACKATHONS

METHODOLOGY

Based on the Raising Awareness Campaign, the use of the MAKERSPACE PROCEDURE FILE that will contain the summary of the whole project to share with the organizations. This will be used as a form of dissemination, but also as an invitation for the organizations to participate in the roles above mentioned. In other words, the aim is to share the file with as many enterprises, stakeholders, NGOs, etc. as possible that may (or may not) later get involved in the following phases of the project.
Politeknika Txorierri, supported by ITHS and PCG will create the mentioned file and ask for feedback to the rest to the rest of the partners.
**As a means to involve diverse organizations, the MAKERSPACE PROCEDURE FILE should be translated to national languages.
