Description of activities	*This Multiplier Event was organized by TKNIKA (a VET innovation center promoted by the Deputy Ministry of Vocational Education and Training of the Education Department of the Basque Governmen), an annual event that gathers VET centers' representatives and related interested persons of the Basque Country. This event has the goal of presenting by menas of round tables the projects in different sessions. The smartAIproject was presented during the first roundtable at 9.30, divided into two segments of 20 minutes each. For each project presented, TKNIKA created a list of attendance with the specific logo of the project, where the listeners invited would voluntarily write their names, organization and signature. To this event a total of 105 people were invited, from which 62 demoisntrated interest in the smartAInnovators project and stayed to listen to the project anager (Miren Arrien) for one of the rounds. The project coordinator made use of makerspace file created during the project to present the main description and achivements of theproject, and later showed the wensite and the platform, showcasting the modules created by the project partners, the scenarios and the national and international infographics created. The presentations were held, firstly in English as the listeners on the first segment were mostly international representatives invioted by other Basque VET centers; and the second one was held in Spanish, as many representatives from Basque VET centers were interested in implementing the results from the project as a form of first step to the AI in their organisations.* *In conclusion, Miren Arrien presented the project, the results, the qwebsite and the online platform two times, each one lasting a total of 20 minutes. She carried the presentation for 15 minutes*

	explaining the reasons for the project and the main results achieved making use of the National and International Hackathins as a great opportunity for students to learn and interact with other countries (a point that was extremelly well received by the listeners), and left 5 minutes each round for any question, comment or suggestion, Many attendees demonstrated interest in the project and in its application in their respective organsation, and proceed to make questions in relation to the student age in which the project was introduced, to which VET course in particular, how was the feedback received, etc. *The 62 attendees that listened to the presentation signed the list of attendees created by TKNIKA, and received a booklet with a short project description and a QR code that brings you to the project website, created by TKNIKA in collaboration with Politeknika Txorierri (also annexed as evidence).* *After the roundtables, and during the Networking session at 11.30, many attendees reached out to Miren in roder to keep on speaking about the experience on implementing the project results and the creation process of the National and International Hackathons with the students. Miren reminded them to register in the platform as teachers or students if they were interested in a deeper comprenhension of the materials created, and shared with the the social media channels so they could keep on being informed about the project.* *It came to the attention of the project manager that the National and International Hackathon competitions were a great point to create interest among the many attendees, speacilly after shoiwcasting some of the photos and videos, including the podcast*
